

Consolidated Minerals (Consmín) aims to be the most efficient and market-focused supplier of manganese ore, and to be strategically positioned in other steel-making commodities. The company undertakes focused exploration programmes and will continue to grow through selective investments and acquisitions.

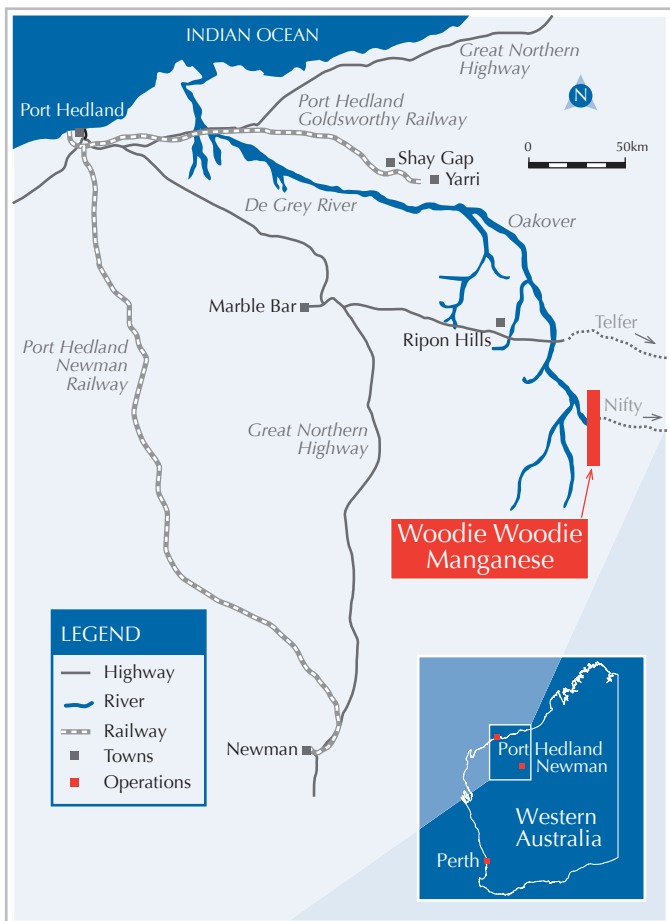

## Woodie Woodie

Pilbara Manganese, a wholly owned subsidiary of Consmín, owns and operates the Woodie Woodie manganese mine in the Pilbara region of Western Australia.

Woodie Woodie is located in the Pilbara region of Western Australia, approximately 400km south east of the town and port of Port Hedland. The Woodie Woodie tenements comprise 5,400km<sup>2</sup> of exploration tenements, within which is an active mining corridor of approximately 100km<sup>2</sup>. The mine is serviced by modern infrastructure including an accommodation village, administration buildings, maintenance workshop facilities, power generation infrastructure, a

sealed all-weather airstrip and a sealed public road which connects the mine to Port Hedland. Woodie Woodie's high manganese and low phosphorus ores and Port Hedland's location proximate to key Asian markets represents a key competitive advantage.

Consmín's corporate headquarters are located in Jersey, UK where Woodie Woodie ore is exclusively marketed through Consmín's wholly owned subsidiary, Pilbara Trading Limited, with Consmín's Chinese representative office located in Shanghai, providing valuable market support in the key market of China.
