

ENVIRONMENT POLICY

Consolidated Minerals is committed to minimising the adverse impacts of its operations and activities on the environment.

We believe that good environmental performance is key to our sustainability. We seek to create a culture where biodiversity is protected and preserved, resources are used efficiently and waste and pollution is minimised.

To deliver on this commitment, we will:

- establish and maintain an effective environmental management system, including processes to identify and manage environmental risk;
- comply with all applicable legislative and industry requirements pertaining to environmental management as the minimum acceptable standard;
- provide sufficient information, advice, training and supervision to ensure that our people are aware of their responsibilities and are competent to undertake their activities;
- establish channels of communication and consultation which encourage all employees to contribute to improvements in our environmental performance;
- recognise and reward good environmental performance and apply established disciplinary procedures to those who deliberately breach our requirements;
- establish procedures for the audit and review of our environmental management system; and
- develop and review, on an annual basis, plans that include detailed and measurable objectives and targets for the continuous improvement of our environmental performance.
